

NATIONAL AMERICAN UNIVERSITY

ARTICULATION AGREEMENT

National American University and Antonelli College agree to recognize and formalize a collaborative degree completion program on the terms and conditions set forth in this agreement.

National American University is accredited by the Higher Learning Commission and a member of the North Central Association of Colleges and Schools.

Antonelli College is accredited by the Accrediting Commission of Career Schools and Colleges.

Both institutions periodically review their academic programs and courses, student support services, and learning resources.

To allow students to transfer credits earned at Antonelli College to National American University with a minimum of delay and disruption in their educational process, the parties agree as follows:

1. **Articulation.** National American University will admit graduates of Antonelli College's associate degree programs into the Bachelor of Science degree programs listed in its undergraduate catalog, subject to university policies and procedures. Available programs include the following:
 - The Bachelor of Science in Management program is designed for adults with transferable college credit who are seeking opportunities for advancement in the field of business management. Students combine college credit from accredited institutions or non-traditional prior learning from a specialty field with a comprehensive management curriculum and relevant general education courses. They may also create their own subject area of concentration, utilizing National American University course offerings. Students enrolling in this program are encouraged to have specific career goals that align with their chosen area of specialty.
 - The Bachelor of Science in Information Technology program is designed to provide the flexibility to integrate specialized technology and skills into a customized information technology program. It is intended for individuals with degrees, diplomas, certificates or certifications in specialty areas, such as information technology, computer science, programming, networks, computer-aided design and database, and other related areas. A minimum of 27 credit hours in one specialty area is required to complete this program. This degree prepares graduates for advancement in management or technical areas associated with their specialty field. In this program, students have the option to: (1) transfer credit from the source of the specialty training, or (2) create a specialty area using approved National American University courses.
 - The Bachelor of Science in Healthcare Management program is designed to provide students with the necessary skills to become effective managers and leaders within the healthcare industry. Graduates can expect to find career opportunities in management positions within the diverse healthcare field or within their own area of clinical/professional expertise.
 - This Bachelor of Science in Organizational Leadership program is designed for persons seeking to upgrade their leadership skills and advance in organizations. Graduates will combine core business knowledge with insight and skills gained from the added dimension of course work in organizational leadership. These courses are designed to prepare students to be better leaders, to initiate change, to solve problems, and to foster more innovative learning environments.
2. **Block Transfer Policy.** (a) National American University's block transfer policy (General Education Equivalency) applies to all bachelor's degree programs with the exception of the following: Nursing and the Management program offered in Kansas. All transfer course work must be college level (1000-level or above).

(b) Block transfer does not apply to students attending Minnesota campuses. If students were eligible for block transfer on enrollment, a subsequent change of degree program request will initiate the reevaluation of eligibility for block transfer in the new degree program.

(c) Students who have earned a bachelor's or associate degree, regardless of the type, with the equivalent of at least 50 quarter credit hours of general education courses, meet the requirements for National American University's general education core area available for block transfer.

(d) Students who have earned an Associate of Arts (AA), Associate of Science (AS), Associate of Applied Science (AAS), Associate of General Studies degree or a technical Bachelor of Applied Science degree from an accredited institution may be eligible for block transfer in the university's Bachelor of Science in Management and Bachelor of Science in Information Technology degree programs if sufficient transfer credits are available.

3. **Term.** The term of this agreement shall commence on the effective date indicated on the first page. This agreement may be terminated by either party's providing to the other party at least ninety (90) days' written notice of its intent to terminate.
4. **Continuing Duties.** Upon termination of this agreement, National American University will continue to perform the duties and responsibilities set forth above for any student who has commenced a Bachelor of Science degree program but not completed it at the termination date.
5. **Amendment.** This agreement may be amended by a written document signed by both parties.
