

ANTONELLI COLLEGE

Shannon Conley
Interior Design

I chose interior design because it has always been a passion of mine. I had started at another school and felt it was lacking so I called Antonelli.

Antonelli has such a comprehensive program. The program is extensive outside of residential with commercial and CAD. The department is brilliant and pushes us to learn more and become better designers.

Right around graduation, I took a job as a Designer at Designs on Madison and work with award winning designers every day. The firm is very active with Homearama in Cincinnati.

Now I am a totally different person. School gave me self confidence and technical savvy. My instructors and my classmates will be long time friends and are a great support system.

If I didn't go back to school, I don't know where I would be. What I gained in going back to school had changed my entire life. It definitely took sacrifice and it was hard, but in the end it was worth it.

I'm working all day-everyday doing what I love!
