

Jessica Skidmore

Dental Assisting
Graduation Date: June 2009

Jessica Skidmore said that she chose the Dental Assisting program at Antonelli College because the small classes appealed to her and she was able to have one-on-one lessons with her teachers so she could learn a lot easier and faster.

"I really love to see the results of my work in front of me," said Jessica. "And I want to help someone have a better smile."

After graduation Jessica went to work for Dr. Harry Goza as a Dental Assistant where her responsibilities include seating patients, assisting the dentist, taking x-rays, charting, cleaning the room after each patient, and sterilizing and disinfecting equipment.

Jessica, a recipient of the Most Outstanding Dental Assistant award said, "My advice to new students is to be confident in what you do. If you're not confident in yourself then your prospective employer will not be confident in you."
